

U.S.S.N. 10/646,329

**REMARKS – General****Objections to the specification:**

The Office Action (OA) objects to the specification. Specifically, the OA submits that the title is not descriptive. Applicants have amended the title to recite “A method and apparatus for delegating current to a plurality of loads.” Applicants respectfully submit that this title is in line with the preamble of claims 4 and 12, and is therefore indicative of the invention to which the claims are directed. Applicants respectfully request reconsideration of the objection in light of this amendment.

**Claim Objections:**

The OA objects to claims 3 and 4 due to minor typographical errors. Claim 3 has been amended to omit an inadvertent “the”. Claim 4 has been amended to properly spell the word “means” in paragraph d. Applicants respectfully submit that these amendments were made merely to correct typographical errors, and were not made for reasons of patentability under *Festo* doctrines. Applicants respectfully request reconsideration of the objections in light of the amendments.

U.S.S.N. 10/646,329

**CONCLUSION**

For the above reasons, Applicants believe the specification and claims are now in proper form, and that the claims all define patentably over the prior art. Applicants respectfully submit that this application is now in condition for allowance. Should the Examiner have any questions or comments, the Examiner is cordially invited to telephone the undersigned Attorney of record to expedite the prosecution of this case.

Respectfully submitted,

Philip H. Burrus, IV

Attorney for Applicants
